

Student Answer Sheet

Student: Sample Student D

Q9

The heart pumps blood throughout the body. It has chambers and valves that help maintain one-way blood flow. The right side receives blood returning from the body and sends it toward the lungs.

Q9 continued

The left side receives oxygenated blood from the lungs and pumps it to the rest of the body. This circulation supplies tissues with oxygen and nutrients.

Q12

This is an extra answer label that does not correspond to any question on the paper.
